

Euclid Q1 Cloud Data Access

June 14, 2026

Troy Raen, Caltech/IPAC-IRSA
IRSA Data Science Lead

Euclid Data on the Cloud

IRSA serves Euclid Q1 data from both on-premises and on-cloud.

The on-cloud copy is in an AWS S3 cloud storage bucket.

- Free. No credentials required.
- Access from anywhere. (Data is on-cloud, but you don't have to be.)
- Highly parallelizable.
- Speed mostly determined by your bandwidth and proximity to the bucket.

Euclid Q1 S3 bucket name: **nasa-irsa-euclid-q1**
irsa.ipac.caltech.edu/cloud_access/#euclid

Euclid DR1 will be large! IRSA will serve it from S3 only.
